DETAILED ACTION

Election/Restrictions

Restriction to one of the following is required under 35 USC 121:

1-7 Claims 1 and 3 in part, drawn to a peptide, the peptides comprising SEQ ID NO: 1-7, are for example classified in class 514, subclass 16

8-14 Claim 2 in part, drawn to a DNA molecule coding for the peptide, the peptides comprising SEQ ID NO: 1-7, are for example classified in class 530, subclass 388.21.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups 1-7 are polypeptides composed of amino acids linked by peptide bonds and can assume complex tertiary structures. The DNA molecules of groups 8-14 are composed of deoxyribonucleotides linked by phosphodiester bonds and assume the form of a double helix. Inventions of groups 1-7 and 8-14 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because each has a different function and a different chemical composition.

Because these inventions are distinct for the reasons given above and since they have acquired a separate status in the art as shown by their different classification and/or divergent

subject matter, and/or are separately and independently searched, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirements be traversed (37 CFR 1.143).

A telephone call outlining the restriction was made to Norman Oblon on 6/4/03, a written restriction was requested on 6/11/03.
